

Headline: Dr. Temple Grandin on the Sensory Friendly Solutions Podcast
For release: Tuesday, December 1, 2020

The Sensory Friendly Solutions Podcast is pleased to announce the release of a bonus episode for its inaugural podcast season. This episode is live today, Tuesday, December 1, and features Dr. Temple Grandin as our guest.

Dr. Temple Grandin is renowned as trailblazing spokesperson for autism and her study of animal behaviour. Her lifework has been to understand her autistic mind and to share that knowledge with the world.

During her appearance on the podcast, she had a meaningful conversation about the different types of human thinking, the strengths of the autistic brain, and examples of sensory differences. Dr. Grandin is an engaging speaker. Her experiences resonate with a wide audience, including people who identify with neurodiversity, autistic adults, and parents of children diagnosed with autism or sensory processing disorders. Dr. Grandin's work is inspirational and informative.

About Sensory Friendly Solutions

Sensory Friendly Solutions' founder and CEO, Christel Seeberger, spent over a quarter of a century as an occupational therapist in public and private practice. There, she observed an increasingly prevalent challenge amongst her clients: sensory overload. Coincidentally, Christel started to experience sensory-sensitivity herself, developing adult-onset hearing loss. She realized she had to take a new approach to solve the challenges faced by this large and growing segment of the population. Christel founded Sensory Friendly Solutions in 2016 with the mission of making the world more sensory-friendly.

About Dr. Temple Grandin

Dr. Grandin has been a professor at Colorado State University (CSU) for over 25 years. Her understanding of the human mind has aided her in her work with animal behaviour, and she is one of the most respected experts in both autism and animal behaviour in the world. Dr. Grandin was the subject of an Emmy award-winning movie produced by HBO. The critically acclaimed film depicted her life and many accomplishments. She was inducted into the American Academy of Arts and Sciences in 2016.
